=====  
=====

Dear E100:

This is the 3rd. and final Update on the Monterrey Joint Event: THE III E100 ROUNDTABLE , the THE LATIN AMERICAN FORUM ON KNOWLEDGE-BASED DEVELOPMENT and the I ASSEMBLY OF THE IBEROAMERICAN COMMUNITY OF KNOWLEDGE SYSTEMS. Right one month before our encounter, we are all set: the Forum program, the specific Entovation and CISK agendas, the list of confirmed participants, the venue, the official hotel and airline and, of course, the website where you can find details on all these aspects and any further updates: <http://www.knowledgesystems.org/e100mty>

We are pleased to announce that as a corollary to the Forum, a satellite TV session will be broadcast live to 1300 receiving sites throughout Latin America with the participation of all Forum attendees, via Monterrey Tec Virtual University Network on Monday November 3, from 16:30 to 18:00. Other new developments adding to the depth and transcendence of the event will be confirmed in the following days, but the structure of the program has been determined on the basis of the integration carried out by Debra, Doug and myself and recently communicated to you all, so you could finalize your travel arrangements.

Instructions for taking advantage of airfare and hotel discount fares and other useful travel information, as well as any further announcements, will continue to be available at the webpage. If you have any special query please contact Monica Espinosa [mepinos@itesm.mx](mailto:mepinos@itesm.mx)

I look forward to welcoming those of you who will be able to join in Monterrey and to share with those of you who regreably will not, the results of this unique experience through regular Entovation channels. By breaking the limits of current thinking in Knowledge-based Development we expect this event to have a resonance in global knowledge innovation.

With all best wishes,

Javier Carrillo
